

PNG alpha scrim

translucent gradient

The image features a horizontal color gradient that transitions from a deep, dark blue on the left side to a vibrant, bright red on the right side. This gradient is semi-transparent, allowing a grid of squares to be visible underneath. The grid consists of squares that are slightly darker or lighter than the background color at their respective positions, creating a subtle checkerboard or mosaic effect. The overall effect is a smooth, ethereal transition of color across the entire frame.
